

Eigen::internal::traits< PlainObjectType >

Eigen::internal::traits< PlainObjectType >

Eigen::internal::traits< TensorRef< PlainObjectType > >

```
graph BT; A[Eigen::internal::traits< TensorRef< PlainObjectType > >] --> B[Eigen::internal::traits< PlainObjectType >];
```

The diagram illustrates the inheritance of traits in Eigen. A box at the bottom, representing `Eigen::internal::traits< TensorRef< PlainObjectType > >`, has an arrow pointing upwards to a box representing `Eigen::internal::traits< PlainObjectType >`. This indicates that the traits of `TensorRef` inherit from the traits of `PlainObjectType`.
