

RangeBuilder::type< MIN, MAX >

RangeBuilder::type< MIN, MAX >

utility::tuple::IndexRange< MIN, MAX >

```
graph BT; A[utility::tuple::IndexRange< MIN, MAX >] --> B[RangeBuilder::type< MIN, MAX >]; A --> C[RangeBuilder::type< MIN, MAX >];
```

The diagram illustrates a relationship between three types. At the bottom is a box containing 'utility::tuple::IndexRange< MIN, MAX >'. Two arrows originate from this box: one points to the left box 'RangeBuilder::type< MIN, MAX >' and the other points to the right box 'RangeBuilder::type< MIN, MAX >'. This suggests that 'utility::tuple::IndexRange' is a base or specialization for both 'RangeBuilder' instances.
