measure_all_pot_sizes_action_t

```
graph BT; A[measure_all_pot_sizes_action_t] --> B[action_t]; A --> C[action_t]
```

The diagram illustrates a branching structure. A single box at the bottom, labeled 'measure_all_pot_sizes_action_t', has two arrows pointing upwards to two separate boxes at the top, both labeled 'action_t'. The arrows originate from the top edge of the bottom box and branch out to point at the bottom edge of each of the top boxes.
